Economics Internship Program

Internships are academic courses that allow students to apply classroom theory in a practical work setting and gain personal, academic and work competencies.

- One semester
- Major-related
- Off-campus
- Three (3) Credit Hours
- Paid or unpaid
- S/U Grade will be assigned
- DOES NOT COUNT AS A RESTRICTIVE ELECTIVE

Department of Economics internships are available to juniors and seniors majoring in economics and have a 2.5 GPA overall. The objective of the internship is to provide students the opportunity to gain valuable experience at an organization or company while receiving academic credit. The internship cannot be with your present company, unless it will be under a supervisor other than your present one. You are expected to work a minimum of 20 hours a week for the internship.

The Economics Internship Coordinator is Dr. **Ernest Gibbs**. The application form, College of Business audit sheet, resume and letter from the supervisor on company letterhead detailing major responsibilities, hours, etc., must be submitted to Dr. Gibbs two weeks prior to the start of the semester.

Progress Reports: submit three (3) one page memos (via fax, letter, or in person) summarizing the progress of your internship acknowledged and signed by your intern supervisor, due on the 4th, 8th, and 12th week of the semester. Keep a diary of job-related activities, memos, reports, etc. that you prepare. The Final Report (7-10 pages) should include a summary of your work, skills you've learned, and skills and concepts learned at UCF that were applied as an intern.

Internships which work with all majors are available to all students at the University of Central Florida for elective credit through the [Office of Experiential Learning](#).
